

Framed vs Frameless Cabinets

All kitchen cabinets are built as Framed (the traditional American style) or Frameless (also known as European style). You can determine your style of cabinets in two different ways:

1 LOOK AT CABINET BOX CONSTRUCTION

Framed

A face frame is attached to the front of the cabinet box.

Frameless

No face frame is attached to the cabinet box.

2 LOCATION OF WHERE HINGE IS ATTACHED

Framed

Door hinges are attached to cabinet frame.

Frameless

Door hinges are attached to cabinet box.
